

Introduction

Industrial Grade High-quality Push Button in the metal body. Internal indication light to indicate status. These metal push buttons are very tough, small, panel-mount switches with an illuminated LED Ring. This button is perfect for basic On/Off functions.

The Indication LED has its own 2 Pins, it can be turned on by 12-24V Power and can be controlled independently from the switch. This is an SPST Single pole switch with C, NO, and NC terminals. This allows you to control up to 1 device.
